

MECHANICAL HVAC ENGINEER

McMAHON has an immediate opening for an HVAC Professional Engineer in their Neenah, WI office.

Preferred qualifications include a Bachelor's Degree in Mechanical Engineering, or a four year degree from a technical school equivalent. A PE is preferred, but applicants with a State of Wisconsin Designer of Mechanical Engineered Systems License, or a degree from an ABET Accredited program with the ability to attain a PE in the future will be considered. This position will include HVAC design and project management. The ideal candidate will be highly self-motivated, have strong communication skills, and be proficient in AutoCAD with Revit experience being a plus. An individual with the capability to design and draft plumbing and fire protection systems will also be a plus.

Typical activities of the position include:

- Heating and Cooling Load Calculations
- Mechanical Ventilation and Hydronic Design and Layout
- Industrial, Commercial, Educational, and Health Care HVAC Design
- Mechanical, Plumbing and Fire Protection Systems Drafting in both AutoCAD and Revit.

Please submit your resume in confidence to:
