

ELECTRICAL ENGINEER - INDUSTRIAL PROJECTS

McMAHON has an immediate opening for an Electrical Engineer in their Neenah, Wisconsin Office.

Preferred qualifications include a Bachelor's Degree in Electrical Engineering, or Architectural Engineering with a specialty in Industrial Electrical Systems, including water and wastewater treatment facilities, paper mills, and industrial dairies. Position requires experience in electrical power distribution, facility electrical design, lighting systems, and power system analysis. The ideal candidate will also possess strong computer and AutoCAD skills, with Revit experience a plus. Competitive compensation and benefits package available.

Typical activities of the position include:

- Electrical design of industrial facilities.
- Design of industrial power distribution systems.
- Power system analysis, including short circuit, coordination, and arc flash analyses.
- Industrial lighting design and photometric calculations.
- Design of variable frequency drive systems.
- Design of industrial automation systems.
- Fire alarm design and layouts.
- Electrical drafting, using AutoCAD and Revit
