

PUBLIC SAFETY & MUNICIPAL MANAGEMENT

McMahon Associates, Inc. offers **Public Safety & Municipal Management Consulting Services** through experienced professionals who possess in-depth knowledge of all relevant aspects of public & emergency management and can provide the following services to our clients:

Public Management. Municipal management of all municipal departments including administration, public works, engineering, parks and recreation. McMahon can assist with organizational analysis, management counsel and interim administrative or management services.

Public Safety Management. Police, Fire and EMS consulting and services that include management counsel and interim management in all public safety fields. McMahon has extensive background in all areas of public safety and consultants who have been providing these services for over 35 years.

Security Management. McMahon consultants combine public safety, military and security backgrounds into comprehensive security analysis for all areas including churches, private business, municipalities and schools. There are services starting with building design, business security analysis, operational security review, security and emergency operations plan development, through training of personnel.

Emergency Management. McMahon can provide all aspects of emergency management. This includes planning, emergency operation plans, severe weather plans, Emergency Operations Center design and setup, training and coordination with local and State emergency management officials and Incident Management Teams.

School Safety. McMahon provides a comprehensive approach to school safety, which includes security analysis, security design build, coordination with local authorities and training.
