Week of April 5 - 9

Michels Corp. mobilized back on site to resume work on the Evergreen Dr. Project after the winter break. The contractor worked on demolition of the existing north parking lot of the Town Hall and eventually made their way to the eastbound lane of Grand Chute Blvd. The existing curb & gutter and asphalt pavement of Grand Chute Blvd. was removed from the north project limits to shy of the Town Hall main entrance. Two-way traffic was established on the westbound lane of Grand Chute Blvd. through the current work zone. The weather cut Michels' week short with the contractor only working a half day on Thursday and no work on Friday.

Looking Ahead to Next Week:

Michels will continue with demolition and start road sub-grade excavation for the eastbound lane of Grand Chute Blvd. Highway Landscapers is scheduled to begin work on the new retaining wall at the southwest corner of the Town hall.

NOTES TO PUBLIC

The public still has full access to the Town Hall and to Town Center Park. Traffic control devices are in place to guide two-way traffic through the work zone. The trail through the work zone is closed, and pedestrians should use alternate routes.
