

PROJECT UPDATES

Xavier High School's Rocky Bleier Field

Groundbreaking ramps up excitement for student events

McMahon is providing site design/engineering and construction management services for the enhancements planned for Xavier High School's Rocky Bleier Field. Field renovations include installing artificial turf, new high jump area/long jump pits, the addition of water to player sidelines and upgraded electrical facilities. These changes will broaden the student events and experiences that can make use of the field and will provide year-round access for the entire St. Francis Xavier School System community beginning in the 2024 season.

Hilbert School District

McMahon is excited to see the progress at Hilbert School District. McMahon was the architect for the additions and renovations happening within the district which include facilities for career and technical education, band and choir, locker rooms, a fitness center and expansions to the current lunchrooms and common areas. This was the third referendum McMahon has partnered with Hilbert School District on in the last 12 years.

# Excellerate

Now open

We are excited for our partners at Excellerate who opened their building in Little Chute at the end of 2023!

We're thankful for the opportunity to design and partner with some great companies as the architectural and engineering lead on this project.
